Publication list

cloelike: A Python Library for Cosmological Likelihood Inference in the Euclid Era
M. Bonici, G. Cañas-Herrera, P. Carrilho, et al. (including **M. Kärcher**), arXiv:2605.23841, submitted to *The Journal of Open Source Software*

cloelib: A Flexible Python Library for Computing Cosmological Observables in the Euclid Era
M. Bonici, G. Cañas-Herrera, P. Carrilho, et al. (including **M. Kärcher**), arXiv:2605.23839, submitted to *The Journal of Open Source Software*

Euclid preparation: Testing multi-field inflation with galaxy power spectrum and bispectrum
Euclid Collaboration: D. Linde, A. Moradinezhad Dizgah, G. Parimbelli, et al. (including **M. Kärcher**), arXiv:2605.21436, submitted to *Astronomy & Astrophysics*

Euclid preparation. Baryon acoustic oscillations extraction techniques: comparison and optimisation
Euclid Collaboration: E. Sarpa, A. Veropalumbo, M. Bonici, et al. (including **M. Kärcher**), arXiv:2605.03446, submitted to *Astronomy & Astrophysics*

Euclid preparation. Galaxy power spectrum and bispectrum modelling
Euclid Collaboration: K. Pardede, A. Eggemeier, D. Alkhanishvili, et al. (including **M. Kärcher**), arXiv:2603.27966, submitted to *Astronomy & Astrophysics*

Euclid preparation. Simulated galaxy catalogues for non-standard cosmological models
Euclid Collaboration: M.-A. Breton, P. Fosalba, S. Avila, et al. (including **M. Kärcher**), arXiv:2603.13148, submitted to *Astronomy & Astrophyics*

Euclid preparation. Galaxy power spectrum modelling in redshift space
Euclid Collaboration: B. Camacho Quevedo, M. Crocce, M. Pellejero Ibañez, et al. (including **M. Kärcher**), arXiv:2601.20826, submitted to *Astronomy & Astrophysics*

Euclid preparation. CI. Galaxy two-point correlation function modelling in redshift space
Euclid Collaboration: **M. Kärcher**, M. A. Breton, S. de la Torre, et al., arXiv:2601.04780, *Astronomy & Astrophysics*, 713, A212 (2026)

Euclid preparation. LXXVIII. Full-shape modelling of 2-point and 3-point correlation functions in real space
Euclid Collaboration: M. Guidi, A. Veropalumbo, A. Pugno, et al. (including **M. Kärcher**), arXiv:2506.22257, *Astronomy & Astrophysics*, 707, A228 (2026)

Towards an optimal marked correlation function analysis for the detection of modified gravity
M. Kärcher, J. Bel, S. de la Torre, arXiv:2406.02504, *Astronomy & Astrophysics*, 694, A253 (2025)

Euclid. I. Overview of the Euclid mission
Euclid Collaboration: Y. Mellier, Abdurro'uf, J. A. Acevedo Barroso, et al. (including **M. Kärcher**), arXiv:2405.13491, *Astronomy & Astrophysics*, 697, A1 (2025)

Euclid preparation. XLI. Galaxy power spectrum modelling in real space
Euclid Collaboration: A. Pezzotta, C. Moretti, M. Zennaro, et al. (including **M. Kärcher**), arXiv:2312.00679, *Astronomy & Astrophysics*, 687, A216 (2024)
